

Eshwaroju Lahari

AI/ML Engineer

Hyderabad, Telangana, India • 22wh1a6637@bvrithyderabad.edu.in • +91-7095089218
linkedin.com/in/eshwaroju-lahari • github.com/Eshwarojulahari • elahari.netlify.app

Professional Summary

AI/ML Engineer with strong proficiency in Python and a solid foundation in machine learning, data science, and statistical analysis. Experienced in building deep learning models, performing exploratory data analysis, and developing intelligent applications using computer vision techniques. Passionate about solving real-world problems through AI-driven solutions.

Education

B.Tech, Computer Science (AI & ML) BVRIT Hyderabad College of Engineering for Women	2022 – 2026 (Expected)
Intermediate (MPC) Narayana Junior College, Hyderabad	2020 – 2022
SSC (10th Standard) Geetanjali Talent School, Hyderabad	2020 • 98%

Technical Skills

Programming	Python, Java, C/C++
Core Concepts	Data Structures, Algorithms, Object-Oriented Programming
Machine Learning	Scikit-learn, TensorFlow, Keras
Deep Learning & CV	CNN, MobileNetV2, YOLOv8
Data Science	EDA, Data Cleaning, Data Processing, Feature Engineering
Libraries	NumPy, Pandas, OpenCV, Matplotlib, Seaborn
Databases	SQL, MySQL
Frameworks	Django
Tools	Git, GitHub, Jupyter Notebook, Linux

AI & Machine Learning Projects

Plant Disease Detection using Deep Learning from Video Data

Python, TensorFlow, MobileNetV2, YOLOv8

- Developed a deep-learning-based plant disease detection system using video footage instead of static images for more realistic agricultural monitoring.
- Extracted frames from field-recorded plant videos and trained a MobileNetV2 model for disease classification.
- Used YOLOv8 to detect and isolate leaf regions from complex backgrounds, improving feature quality and classification accuracy.
- Implemented a video-level aggregation pipeline combining frame-level predictions to produce reliable disease diagnosis.
- Created a custom dataset using plant videos recorded under natural outdoor conditions to improve model robustness.

Alzheimer's Disease Detection using Machine Learning

Python, TensorFlow, Data Analysis

- Developed a machine learning model to detect early-stage Alzheimer's disease using medical imaging datasets.
- Performed exploratory data analysis (EDA), preprocessing, and feature extraction to improve prediction.

Python Online Compiler

Python, Django

- Developed a browser-based platform allowing users to write and execute Python code directly online.
- Implemented backend code execution and error handling using the Django framework.

Automated File Organization Tool

Python Automation

- Developed a Python automation tool that classifies and organizes files based on extensions.
- Improved file management efficiency by automatically sorting files into categorized folders.

Leadership & Experience

President, ACM-W Student Chapter

2024 – 2025

BVRIT Hyderabad

- Led initiatives to promote women in technology through technical workshops and mentorship programs.
- Organized technical events and collaborative learning sessions for students.

Core Team Member, Devasthra'25 Hackathon

2025

National Level Event

- Coordinated logistics and event management for a 24-hour national-level hackathon with 200+ participants.

Certifications & Workshops

- Generative AI Fundamentals Workshop (2024)
- Java Full Stack Development Certification (2023)
- Codesoft Virtual Internship – Web Development (2023)
- Safe AI Implementation Seminar – BVRIT Hyderabad (2023)
- E-Commerce Platform Development Workshop – IIIT Hyderabad (2025)
