

PNEUMATIC

AIR ISOLATION TABLE

A STABLE FOUNDATION
FOR HIGHER PRECISION

The **PNEUMATIC** Air Isolation Table provides a vibration-free platform for precision inspection, metrology, optical systems, and other sensitive applications. With a precision granite tabletop and pneumatic air suspension system, it delivers excellent stability and repeatable performance even in challenging environments.

KEY FEATURES

Granite Tabletop
High stiffness and dimensional stability

Wide Payload Range
Supports 40 kg to 150 kg (Maximum 150 kg)

Pneumatic Isolation
Natural frequency of 6 Hz

Adjustable Air Pressure
0 to 4 bar (depending on payload)

Reliable Performance
Ideal for precision and vibration-sensitive equipment

SPECIFICATIONS

Table Size	600 mm × 600 mm
Effective Working Surface	600 mm × 600 mm
Tabletop Material	Granite
Payload Capacity	40 kg to 150 kg (Maximum 150 kg)
Isolation System	Pneumatic Air Suspension
Natural / Resonance Frequency	6 Hz
Air Supply Pressure Range	0 to 4 bar (depending on payload)
Application	Precision inspection, metrology, optical systems, and vibration sensitive equipment
